From us to you...

At Hoffman Boots, our family-owned business has had the same motto from the beginning: **offer a high quality, functional product at a fair price, and let that be the basis of our company's future.** For five decades now, that is what we at Hoffman's have done.

We know that there are a lot of choices for you, the consumer, to choose from in footwear. That's why we spend extra time and research in offering you the best quality materials we can find in each and every pair of Hoffman's boots. We take pride in knowing that every pair of our Hoffman pac leather uppers are made in Kellogg, Idaho. From our high-quality, industrial-grade, waterproof bottoms that resist cracking and premature rebuilds, to our exceptional form-fitting, oil-tanned leather uppers, you can be sure that the boots you are buying have stood the test of time.

If you ever have a question or suggestion, or if you just need help in choosing the right boot for you, feel free to call. Our friendly staff will gladly take the time to help you select the proper boot. Also, be sure to look at Hoffman's sure-fit guarantee. We want you to feel as confident as we do, so when you place an order with us, you'll receive a boot that meets your high expectations. All of us here at Hoffman's would like to thank you for your interest in our boots.

ARMOR PRO

8" ARMOR PRO *(Calk / Vibram Boot)*

The Armor Pro has quickly become our number one selling calk boot for loggers, foresters and tree planters... and for good reason. The Armor Pro features an additional rubber stark material (bed-liner type) that is bonded directly to the leather upper. This flexible, abrasive resistant material can withstand jagged materials and other objects better than regular leather. The Armor Pro also has a water-resistant membrane to help keep you dry and a full contour cushion insole for additional comfort. A solid toe-to-heel nylon midsole adds lateral stability and your choice of a calk or Vibram sole provide excellent traction. This boot is a great choice for those looking for a comfortable work boot with outstanding wear. **Note: Once Hoffman's has added a calk sole to this boot, Hoffman's will not warranty the waterproofness of the boot.**

#8"Armor Calk (Calk Sole)

#8"Armor Vib (Vibram Sole)

- One-piece vamp construction eliminates seams that can cause discomfort.
- 8" tall uppers constructed with 2.8mm full-grain leather.
- Stark rubber coating on leather for highly abrasive environments.
- Heavy nylon midsoles provide the support needed on uneven terrain.
- Waterproof Sympatec membrane and rubber coating keep the moisture out.
- Your choice of Calk or Vibram FAR slip-resistant high-traction sole.
- Non-insulated for cool to warm conditions.

6" RHINO *(Calk/Vibram Boot)*

Our new 6" Rhino is a durable hiker style boot that is available in both calk and Vibram sole. Built with the same rubber coating as the 8" ArmorPro, the new 6" Rhino is a perfect choice for those looking for a hiking-style boot with extra abrasion protection. The Rhino also features a water-resistant Sympatec bootie to help keep you dry and a cushioned insole for comfort. **Note: Once Hoffman's has added a calk sole to this boot, Hoffman's will no longer warranty the waterproofness of the boot.**

10" ARMOR PRO *(Calk/Vibram Boot)*

With the success of the 8" Armor Pro, Hoffman's has developed a new 10" version for those needing an upper with additional height. The NEW 10" Armor Pro comes complete with all the great features found in our 8" version and is available with both a calk or Vibram sole. The Armor Pro has become our best-selling boot so we are happy to bring you this additional 10" boot to choose from.

7" WOMAN'S ARMOR PRO

Ladies, we have not forgot about you. Finding a durable work boot in woman's sizes is nearly impossible.... until now. The Armor Pro boot has been one of the best boots Hoffman's has offered to our customers. The durability and performance of this boot has been second to none. This boots has all the same durable features that our regular Armor Pro has, just built for the ladies.

6" MEINDL CRUISER *(Calk/Vibram Boot)*

Our new 6" Meindl Cruiser boot is a fantastic boot. Built with a very supportive upper, the 6" Cruiser offers stability and comfort on some of the roughest terrain. The one piece upper design limits the amount of stitching in the boots which helps eliminated the chance for seam failure. The Cruiser features

FITTING TIPS: Order 1/2 smaller than usual.

an addition rubber rand that extends around the boot upper to add durability to it. A waterproof bootie is added that helps keep water out in wet conditions. **Note:** Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warranty the waterproofness of the boot.

#C Cruiser (Calk Sole)
#V Cruiser (Vibram Sole)

- Water-resistant liner.
- Excellent lateral stability.
- Rubber rand for added protection.
- Available in Calk and Vibram sole.
- Sizes: 7-12 w/ half sizes, 13 (M/W width).

10" MEINDL LOGGER *(Calk/Vibram Boot)*

We at Hoffman's are excited to have the 10" Meindl Logger Boot in our line of quality footwear. The German made Meindl boot has a very supportive upper that provides excellent leg support and stability on steep terrain. A **water-resistant bootie** is added to help insure all day dryness and a removable insole adds cushion to your every step. The unique upper design has a minimal amount of stitching. A removable calk sole is added for good traction and long wear. Easy to break in, the **Meindl Logger Boot** is ideal for those looking for a comfortable boot with a waterproof liner. **Note:** Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warranty the waterproofness of the boot.

#C Logger (Calk Sole)
#V Logger (Vibram Sole)

- Water-resistant liner.
- Excellent lateral stability on steep terrain.
- Durable rubber wrap to extend wear.
- Available in Calk and Vibram soles.
- Sizes: 6-12 w/ half sizes, 13 (M/W width).

FITTING TIPS: Order 1/2 smaller than usual.

10" INSULATED KOOTENAI *(Calk/Vibram Boot)*

The Meindl Kootenai is the same boot as the Logger but with an added 400 grams of Thinsulate insulation. If you're needing a sturdy mountaineering boot with insulation, the Kootenai is a great choice.

Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warranty the waterproofness of the boot.

#C Kootenai (Calk Sole)

#V Kootenai (Vibram Sole)

- Insulated w/ 400 gram Thinsulate.
- Water-resistant liner.
- Excellent lateral stability on steep terrain.
- Durable rubber wrap to extend wear.
- Available in Calk and Vibram soles.
- Sizes: 7-12 w/ half sizes, 13 (M/W width).

FITTING TIPS: Order 1/2 smaller than usual.

10" GRIZZLY CALK

The Grizzly Calk is one of our latest additions to our line. The Grizzly features a 10" leather upper with a Kevlar PU finish on the leather which helps protect the upper from abrasion. The Grizzly features a waterproof membrane to help keep you dry in wet weather. A protective rubber rand protects the leather upper from sharp edges and debris. The midsole is composed of different densities EVA layers with PU shock absorbing characteristics and stabilizer insert to provide added comfort. Shown with replacement calk sole but also available with a Vibram style sole if needed. **Note:** Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warranty the waterproofness of the boot.

#CGrizzly

- Full rubber rand
- Waterproof membrane
- Non-insulated only
- Sizes 7-12, w/ half sizes, 13

8" KODIAK

When you're looking for a lightweight logging boot, it is essential to consider features like safety, comfort and durability. The New Hoffman Kodiak meets all of these criteria. The replacement calks enhance your grip on slippery or uneven surfaces which helps prevent falls for added safety. Being one of the lightest calk boots we offer, there is less fatigue at the end of the day which leads to more comfort during the day. The Kodiak features our Armor Coating over the leather in the vamp area to help protect the upper where most wear occurs and a breathable anti-cut fabric upper lessens the weight and provides more breathability. Shown with replacement calk sole but also available with a Vibram style sole if needed. **Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warrant the waterproofness of the boot.**

- Full rubber rand
- Waterproof membrane
- Non-insulated Only
- Sizes 7-12, w/half sizes, 13, 14

#C Kodiak (Calk Sole)
#V Kodiak (Vibram Sole)

HOFFMAN EXPLORER CALK

The Hoffman Explorer Boot is expertly crafted for the outdoorsman seeking both durability and comfort in challenging terrains. The Explorer is our most popular hunting boot . . . and for good reason. Constructed with high-quality waterproof materials and a full rubber rand, the Explorer provides a unique fit that other boots can only envy. Because of the high demand we have had to add our calk sole to this boot, we are now making this boot available to everyone. Combined with the aggressive calk sole, the Explorer Calk provides exceptional traction on various surfaces ensuring you stay grounded and confident with every

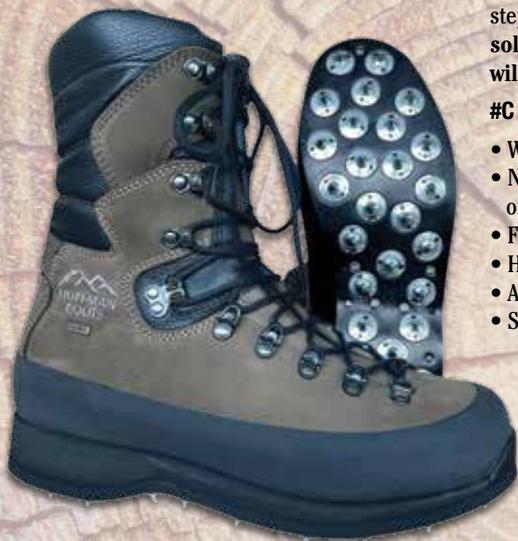

step. **Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warranty the waterproofness of the boot.**

#C Explorer (Calk Sole)

- Non-insulated (Insulated available as special order)
- Full rubber rand
- Heavy duty leather upper
- Available in medium or wide widths
- Sizes: Med. width

(Sizes 7-13 w/ half sizes, 14, 15)

Wide Width (8-13 w/ half sizes, 14)

HOFFMAN TRAVERSE

The Traverse features a lightweight, breathable upper made for the individual looking for a boot to wear on warmer days. With a mix of leather and Cordura in the upper, air is able to pass through the boot much easier to help keep the foot cooler. The leather portion features our additional Armor Coating to help protect and prolong wear. A water-resistant bootie aids in keeping moisture out so your feet stay

dry. The Traverse also features a flexible mid-sole that adds more flexibility to the boot. Hoffman's calk sole provides outstanding traction or a regular Vibram sole is also available if preferred. The Traverse is a great option if flexibility and more ventilation in your boot is needed. **Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Meindl will warranty the waterproofness of the boot.**

TUSCIA HIKER CALK

The Tuscia Hiker is our newest addition to our line of calk boots. This lightweight hiker-style boot features the latest in durable materials. The upper features a polyamide fabric which is very durable and abrasion-resistant. The Tuscia also features a padded collar for comfort, a durable rubber rand and a high visibility heel reinforcement. Available in both Calk and Vibram sole. Although waterproof failure is rare, Hoffman's will not warranty the waterproofness of this boot once calks are added. **Note:** This hiker is not recommended and should not be worn while operating a chain saw. Check with your local OSHA representative for other work-related use of this lightweight hiker.

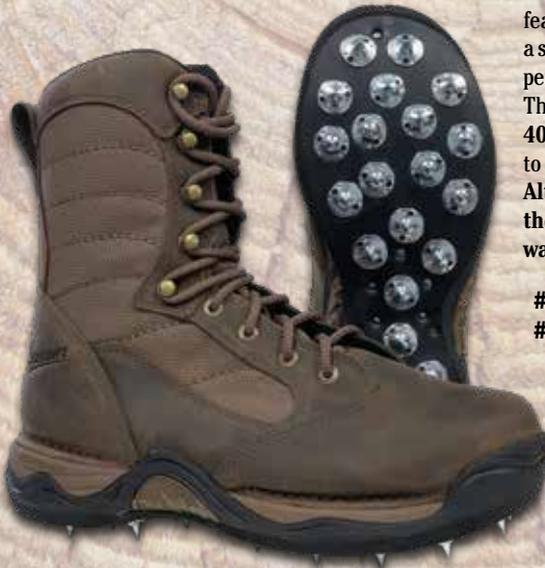

#Tuscia Calk

#Tuscia Vib

- Lightweight for less fatigue
- Durable upper material for extended wear
- Calk or Vibram style sole available.
- Not for use while operating a chain saw
- Made in Europe
- Med width: 7-12 w/half sizes, 13

8" PRONGHORN CALK *(Insulated available)*

The NEW Danner Pronghorn is well known in the Northwest for its dependability and ruggedness in the outdoors. By adding a calk sole to this boot, Hoffman's provides you with a lightweight alternative to heavier all-leather calk boots with the added benefit of a waterproof liner. The **Pronghorn Calk** also features a cushion insole, durable midsole and a steel shank for support. A leather/Cordura upper for lightweight durability comes standard. The Pronghorn Calk is also available with **400 grams of insulation** for those wanting to add some warmth to your boots. **Note:** Although waterproof failure is rare, neither Hoffman's nor Danner will warranty waterproof failure.

#ProngCalk (Non-Insulated)

#InsProngCalk (Insulated 400 Gram)

- Waterproof liner.
- Lightweight for easy mobility.
- Leather and Cordura upper.
- Replaceable calks.
- Sizes D: 7-12 w/ half sizes, 13, 14;
EE: 8-12 w/ half sizes, 13, 14.

GEORGIA *(Calk/Vibram Boot)*

Georgia Boot Company has been making comfortable, durable boots for years and this boot is no exception. We have taken this 8" waterproof boot and added a calk or Vibram sole for those needing outstanding traction. This Georgia boot features a waterproof membrane, 200 grams of Thinsulate, a contour insole and an all-leather upper. We offer this boot in plain toe with your choice of a calk sole or a traditional Vibram lug sole. **Note:** Although this boot features a waterproof membrane, neither Hoffman's nor Georgia will warranty the waterproofing of this boot once a calk sole has been added.

#VGeorgia (Plain Toe Vibram)

#CGeorgia (Plain Toe w/ Calk)

- Waterproof liner.
- 200 gram Thinsulate.
- Calk or Vibram sole.
- Medium or wide widths available.
- Sizes: Med width 5–12 w/ half size, 13, 14;
Wide width: 8–12 w/ half sizes, 13, 14.

8" DANNER QUARRY *(Calk/Vibram Boot)*

The New USA Quarry features a triple stitched full-grain leather upper, Gore-Tex liner and a calk sole for superior traction. A Fatigue Fighter™ footbed with memory foam inserts provide all-day comfort. Also featuring rugged hardware for a secure fit and long lasting performance. Available in both Calk

or Vibram sole and an insulated version upon request. **Note:** Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Danner will warranty the waterproofness of the boot.

#C Quarry (Calk Sole)

#V Quarry (Vibram Sole)

- Gore-Tex waterproof bootie.
- Triple stitched upper.
- Calk or Vibram sole.
- Non-insulated or insulated upon request.
- Sizes: D: 7- 12 w/ half size, 13, 14, 15, 16; EE: 7-12 w/ half sizes, 13, 14.

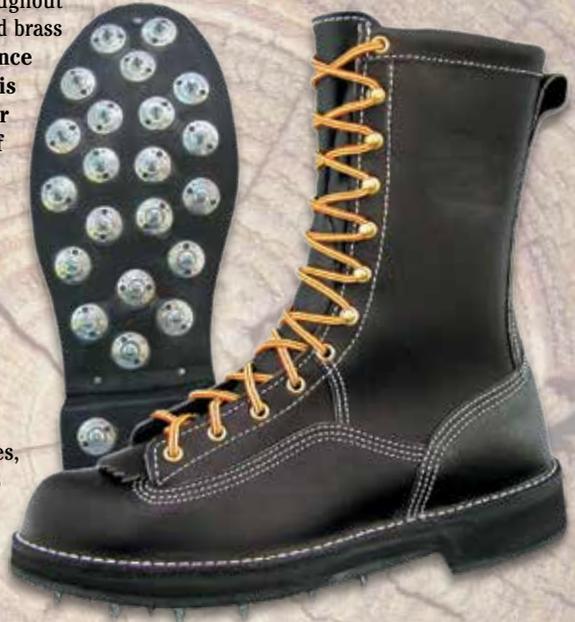

10" TROOPER CALK *(also available insulated)*

This 10" lightweight calk boot contains many excellent features including a water-resistant lining that helps keep feet dry. Replaceable calks and a cushion mid-sole and innersole provide all day comfort. A double layer of 6 ½ oz leather throughout the vamp, triple stitched upper and solid brass hardware are standard features. **Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Danner will warranty the waterproofness of the boot.** Available in non-insulated and insulated styles.

#TRC *(non-insulated)*

#TRIC *(insulated)*

- Insulated and non-insulated available.
- Water-resistant liner.
- Triple stitched upper.
- Cushion crepe mid-sole for comfort.
- Replaceable calk sole.
- **Non-insulated:** Sizes 7–12 w/ half sizes, 13, 14 (D width); 7–12 w/ half sizes, 13 (EE width).
- **Insulated:** Sizes 7–12 w/ half sizes, 13 (D width); 8–12 w/ half sizes (EE width).

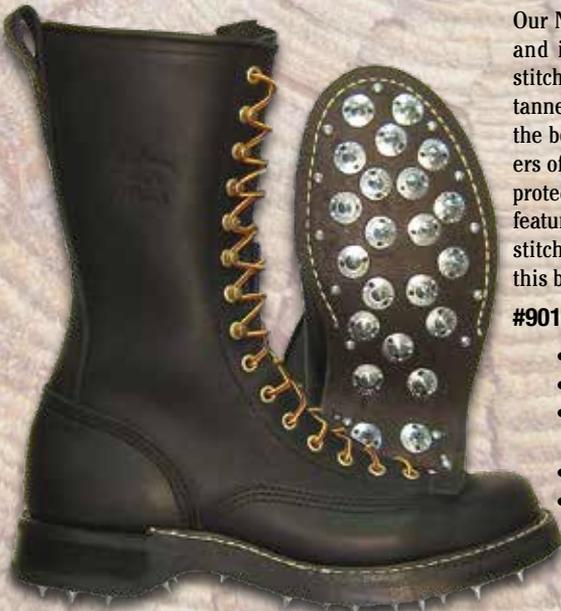

12" #9014 LEATHER CALK

Our New 9014 Spring Heel Calk has some new and improved features added to it. A triple stitched upper now features a heavier grade oil tanned leather that helps prolong the wear of the boot. The double vamp design puts two layers of leather around the foot area for extended protection and durability. The spring heel design features replaceable calks and a sole that is glued, stitched and nailed on. A cushion insole makes this boot a popular design.

#9014 Calk

- 7 ounce leather uppers.
- Durable waterproof heel counter.
- Sturdy midsole for comfort and easy break-in.
- Spring heel sole design.
- Sizes 7-12 w/ half sizes, 13, 14 (E width).

7" WOMAN'S QUARRY *(Calk / Vibram Boot)*

We have had more and more request for a ladies style calk boot. The Danner 7" woman's quarry is a durable boot that provides comfort, a water-resistant membrane and a supportive upper. We have added Hoffman's replaceable calk sole to this boot to provide outstanding traction when needed or choose a Vibram outsole that is also available if needing a less aggressive sole. **Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Danner will warranty the waterproofness of the boot.**

NEW 8" CREW BOSS

Our newly designed Hoffman Crew Boss boot blends the lightweight and supportive benefits of our mountaineering boots with the fire-resistant features used for NFPA standard. This lace-to-toe style boot was designed for forestry work and fire cleanup, and features Vibram's highly heat-resistant, anti-slip sole, which gives you a greater foothold on all types of surfaces. Our one-piece leather upper is designed with a fire-resistant, 2.8 mm leather and is stitched with flame-resistant Kevlar thread. Our full-length 5½ mm tapered nylon midsole provides excellent stability, while allowing the boot to bend while ascending. The inner lining is designed with a multi-layer Arona fabric that provides high breathability and comfort. Cushioned contour insoles and fire-retardant laces complete this wonderful boot. Note: Although this boot has many of the same characteristics of an NFPA-approved boot, it is not certified to NFPA standards. Manufactured in Italy.

Crew Boss Features:

- Lace-to-toe design for outstanding support
- Vibram's high-traction, flame-proof sole
- Superb cushioning and comfort without the weight
- Kevlar stitching in upper
- Fire-resistant full grain 8" leather uppers
- Sizes 7–12 w/ half sizes, 13, 14 (Medium); 8–12 w/ half sizes, 13 (Wide Width)

#CrewBoss

HOFFMAN MID-FLEX

The Hoffman Mid-flex was built to be the “do everything” boot. From your “go to” work boots during the week to your weekend chores, the Mid-Flex offers exceptional comfort and durability for just about everything imaginable. The all leather 2.8-3.0 mill leather upper provides stability and durability to the boot. A 4-5 mm nylon midsole is used to provide added flex yet still providing you with lateral stability and support. The Vibram FAR outsole is an excellent all around sole. Durable enough to handle the toughest terrains while providing great tractions on uneven surfaces. You never know what surprise Mother Nature may have in store so we added a waterproof Sympatec membrane to be sure your feet stay dry. For extra durability, a full rubber rand helps protect the upper. If you’re looking for a boot that is durable enough for everyday use yet can be used for weekend adventures also, you found it. NOTE: For those needing a safety toe boot, we also offer this boot with a composite toe.

Mid-Flex Features

- Full rand for increased protection.
- 4-5mm nylon midsole for easier flex
- 100% waterproof Sympatec™ membrane
- Vibram FAR 1700 Sole w/ PU Inserts

HAIX RX 200 *(Calk/Vibram Boot)*

When you have a tough job to do, you need a strong boot. Out in the elements, you can rely on the quality and European craftsmanship which goes into each pair of HAIX® Airpower XR200 chainsaw safety boots. Two zone lacing lets you maximize the fit of your boot, while the ankle support and protection keeps you on your feet on and off the trail. The Airpower XR200 contains minimal seams for more durability as there is less chance of seam failure especially when hiking through rough brush. The rubber sole gives extra grip and slip resistance too or choose a replaceable calk sole for maximum traction. The Haix XR 200 chainsaw safety boots also has built in cut protection to keep feet safer from accidental chainsaw equipment cuts.

Note: Once Hoffman's has added a calk sole to this boot, neither Hoffman's nor Haix will warranty the waterproofness of the boot.

#CXR200 (Calk Sole)
#VXR200 (Regular Sole)

- Chainsaw cut protection added.
- Safety toe for added protection.
- Gore-Tex bootie.
- Available in Calk and Vibram sole.
- Size 7-12 w/ half sizes, 13, 14

HAIX PROTECTOR ULTRA *(Calk/Vibram Boot)*

The HAIX® Protector Ultra boots have been developed as the latest safety footwear innovation for the forestry industry, guaranteeing great lightweight comfort, breathability and protection. Featuring a two-zone lacing system, the boot can be tightened and adjusted accordingly in two sections, as well as incorporating a GORE-TEX® lining for optimum climate comfort in all seasons – even under the most adverse conditions. Of course, a comfortable boot also must have outstanding protection. The boot has CSA-Z195-2009 protection against cuts and a steel protective toe cap.

#C Ultra (Calk Sole)

CALK

Logging Pacs

THINSULATE® PRO SERIES LOGGER CALK

Quality is always our #1 concern! After working with many rubber companies to find the highest quality bottom available, the choice was made. Our **Thinsulate Pro Series Logger Calk** is the toughest, most durable industrial grade rubber bottom available and is built to take the harshest punishment and keep on performing. This waterproof rubber bottom is constructed with a layer of polyester and polyamid to slow chain saw penetration and eliminate cracking. Our contour leather uppers are made with premium 7 ½ oz. oil-tanned leather and are cut to fit the curvature of your leg. A removable 200 gram Thinsulate/wool liner provides warmth. Heel counter, toe caps and replaceable calks are all standard. Available in steel toe Page 24.

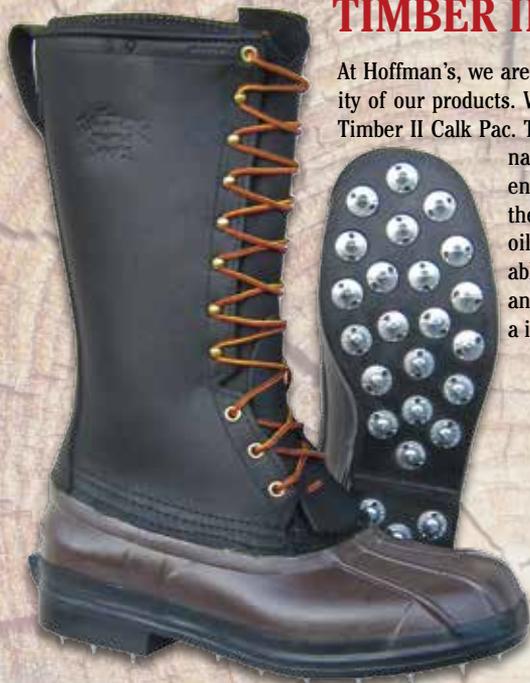

#12C

- Industrial grade rebuildable rubber bottom.
- Replaceable calks for easy maintenance.
- Removable Thinsulate/Wool/Cambrelle liner.
- 7 ½ oz. oil-tanned leather uppers.
- Rebuildable for years of service.
- For mild winter conditions.
- 10", 12" and 14" heights.
- Sizes 6–14 (whole sizes only).

FITTING TIPS: Hoffman Thinsulate® lined pacs tend to run small. Add 1 size to your current shoe size. (i.e.: size 9 or 9½ would order a size 10)

TIMBER II

At Hoffman's, we are always looking for ways to improve the quality of our products. We feel we have done just that with our new Timber II Calk Pac. The Timber II features a top quality NBR and natural rubber bottom that is geared for abrasive environments, which helps prolong the wear of the boot. This compound of rubber is also highly oil- and chemical-resistant and features replaceable calks. A heavy duty oil-tanned leather upper and a removable Thinsulate liner make this boot an instant favorite.

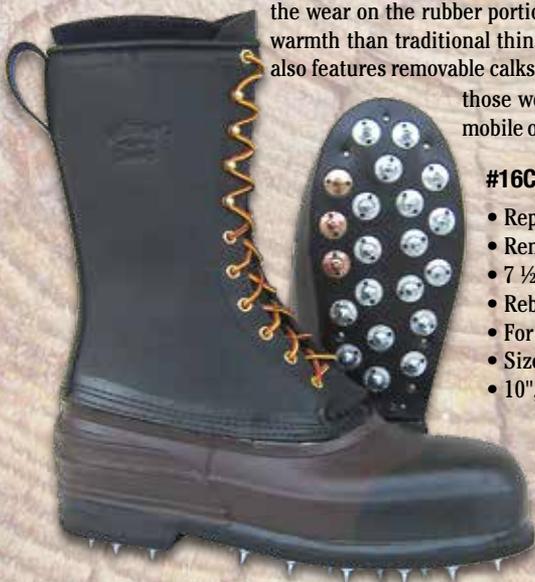

#Timber

- Highly abrasive-resistant natural rubber.
- Replaceable calks for easy maintenance.
- Rebuildable for years of service.
- Lightweight design.
- For mild winter conditions.
- Removable Thinsulate/Wool/Cambrelle liner.
- Sizes 7-14 (whole sizes only).
- 10", 12" and 14" heights.

HOFFMAN FELT LOGGER CALK

The Hoffman Felt Logger Calk has been revamped into a sturdier, longer lasting boot. The NEW Hoffman Felt Logger features an improved rubber bottom made with NBR and natural rubber that will prolong the wear on the rubber portion of the boot. A 9mm felt liner provides more warmth than traditional thinsulate style liners. The Hoffman Felt Pac Calk also features removable calks and a triple stitched, 7 ½ oz. leather upper. For those working in extreme colds or those who are less mobile on your job, this boot makes an excellent choice.

#16C

- Replaceable calks for easy maintenance.
- Removable 9mm Wool/Felt liner.
- 7 ½ oz. oil-tanned leather uppers.
- Rebuildable for years of service.
- For colder winter conditions.
- Sizes 7-14 (whole sizes only).
- 10", 12" and 14" heights.

FITTING TIPS: Hoffman felt pacs run true to size. Whole size order the same. Half size order down (i.e.: 9½ would order 9) unless you have a wide foot.

Authentic Hoffman Pacs

HOFFMAN OUTBACK

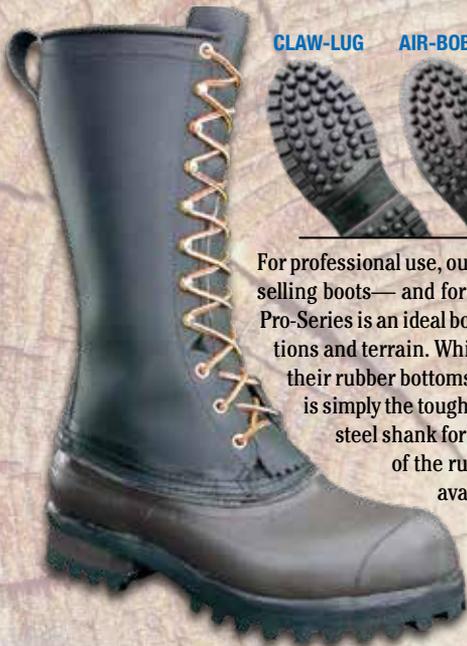

The Outback has all the features of our Hoffman Pro Series Pacs plus the addition of our ankle-loc stabilizer straps for added ankle support. Combined with Hoffman's contour fitted leather uppers, the Outback provides the most support found in any pac boot on the market today. This boot is an excellent choice for hunting the steep, snowy terrain of the Rockies or anytime that optimal support and traction is needed. Lace 'em up tight and you'll be amazed at the extra ankle support the Outback will give you.

#130B

- Industrial grade rubber bottom.
- Designed for mild conditions.
- Thinsulate/Wool/Cambrelle liner.
- Steel shank for support.
- Sizes 6-14 (whole sizes only).

For professional use, our industrial grade Hoffman Pro-Series Pacs are our best selling boots—and for good reason. Less bulky than traditional felt pac, the Pro-Series is an ideal boot for a wide variety of outdoor activities, weather conditions and terrain. While other companies seem to be lessening the quality in their rubber bottoms, Hoffman's Pro Series waterproof, pure rubber bottom is simply the toughest on the market. The crack-resistant rubber features a steel shank for arch support and a rip-stop material built into the walls of the rubber for unbelievable toughness. Four sole choices are available depending on the conditions you are in.

- Industrial grade rubber bottom.
- Designed for mild conditions.
- Rebuildable for years of service.
- 10", 12" and 14" heights.
- Sizes 6–14 (whole sizes only).

DOUBLE INSULATED GUIDE

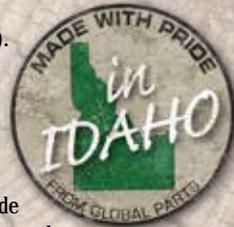

Hoffman's has revamped the Guide boot to add additional warmth making this pac boot a hunter's necessity. We have added a layer of 200 gram thinsulate into the walls of the rubber to provide additional warmth. Next, a 9mm felt insoles has been inserted into the foot bed to limit the amount of cold coming through the bottom of the

boot. An additional 200 gram or optional 400 gram thinsulate liner woven with a 3mm felt and Cambrelle complete the insulation in the Guide. A stout and supportive upper made with premium 7 ½ ounce oil tanned leather and solid brass hardware complete this wonderful boot. The Guide is available in 10", 12" and 14" heights.

#Guide

- Industrial grade rubber bottom.
- Designed for cooler conditions.
- Thinsulate/Wool/Cambrelle liner.
- Steel shank for support.
- Sizes 6–14 (whole sizes only).
- 10", 12" and 14" heights.
- Additional insulation for added warmth.

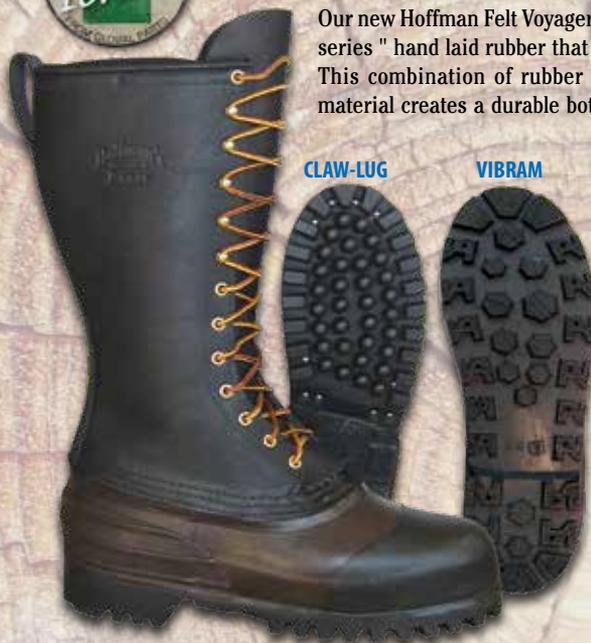

HOFFMAN FELT VOYAGER

Our new Hoffman Felt Voyager is now made with our exclusive "pro-series" hand laid rubber that will outlast normal pac boot bottoms. This combination of rubber and interlining layers of reinforced material creates a durable bottom that is second to none. For traction,

we offer the Claw-Lug sole with stabilizing lugs for superior traction. Our Hoffman Voyager features our exclusive non-twisting arch guard and reinforced toe cap for longtime wear. We attach a heavy 7½ oz. oil-tanned leather upper that is triple-stitched, glued and sealed to give you the most water-resistant felt pac available. The Hoffman Felt Voyager make an excellent choice for use in cold conditions with little or no movement.

CLAW-LUG

VIBRAM

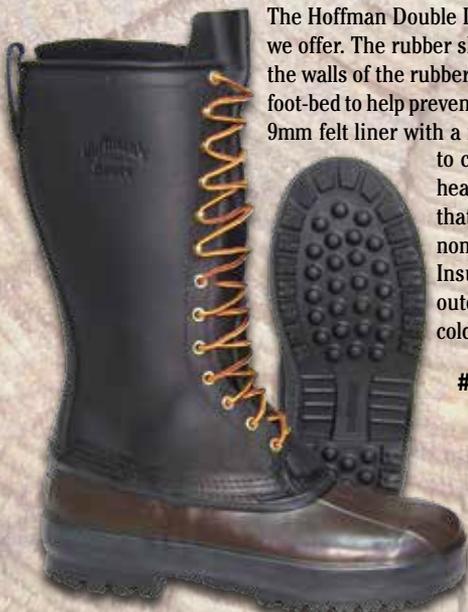

#17VOY (Claw-Lug Sole)

#17REG (Regular Sole)

- Removable 9mm wool felt liner.
- 7 ½ oz. oil-tanned leather uppers.
- Rebuildable for years of service.
- For colder winter conditions.
- Sizes 6-14 (whole sizes only).
- 10", 12" and 14" heights.

HOFFMAN DOUBLE-INSULATED MOUNTAINEER

The Hoffman Double Insulated Mountaineer is our warmest pac boot that we offer. The rubber shell features an addition 200 grams of thinsulate in the walls of the rubber plus an additional 9mm felt insole imbedded in the foot-bed to help prevent cold from seeping through the bottom. A removable 9mm felt liner with a moisture absorbing polypropylene backing is added to complete the insulation in this boot. We've added a heavy 7 ½ oz. oil tanned leather upper to the rubber shell that conforms to the leg. Solid brass hardware and no non-sense laces complete this boot. The Hoffman Double Insulated Mountaineer is an excellent choice for the outdoorsman needing a warmer boot during periods of cold temperatures or low activity.

#Mount

- Designed for colder conditions.
- 9mm wool felt liner w/ polypropylene.
- Rebuildable bottom for extended wear.
- Additional insulation for added warmth.
- Steel shank for support.
- 10", 12" and 14" heights.
- Sizes 6-15 (whole sizes only).

Rubber Boots

LW5 *(with added cut protection)*

The Hoffman LW5 pull-on style calk boot is a tremendous value, featuring an easy-on, easy-off boot design while still offering a supportive upper. The durable rubber is a mixture of NBR (Nitrile Butadiene) and natural rubber, making the boot very resistant to oils and chemicals, while providing excellent abrasive resistance. The LW5 features 9 layers of polyamide tricot/rubber composition in the front of the boot, providing chainsaw protection equal to a class 2 chainsaw boot. Other features include an air-cushioned heel and added protection for the achilles tendon, ankle and metatarsal. **Note: Although this boot has added chainsaw protection features, it is not certified as a chainsaw-certified boot.**

#LW5 (with added cut protection)

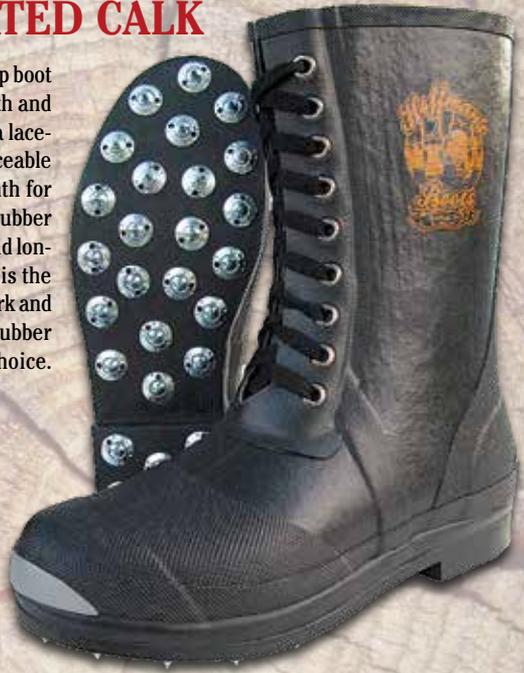

- Natural rubber combined with NBR for durable upper.
- Abrasive-resistant.
- 9-layer tolymide tricot front protection.
- Removable calk sole.
- Sizes 6-14 (whole sizes only)

12" RUBBER INSULATED CALK

Back by popular demand is an all-rubber lace-up boot with a **3mm felt insulation** added for warmth and comfort. Our Rubber Insulated Calk features a lace-up front, reinforced rubber upper and replaceable calk sole. The 3mm felt insulation adds warmth for those cool fall or winter days. An extra layer of rubber around the toe and heel areas adds stability and longevity to the boot. The Rubber Insulated Calk is the perfect choice for those doing reforestation work and thinning. If you need a waterproof, insulated rubber calk boot at a great price, this is a great choice.

#RIC

- Insulated for added warmth.
- Lace-up front for snug fit.
- Replaceable calks.
- Sizes 6-13 (whole sizes only)

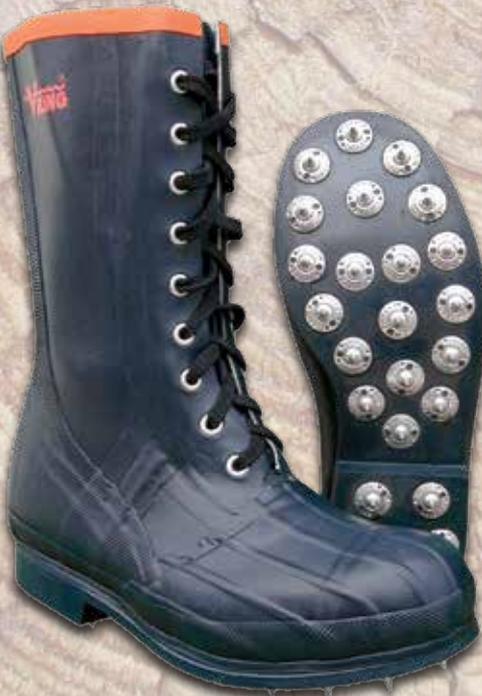

12" RUBBER CALK

Our 12" **Rubber Calk** features a full lace-up front that provides support and stability. The double layer of rubber in the foot and heel area prolongs the wear of the boot. Handmade from all-natural rubber, this boot also features a steel shank, rust-free eyelets and an arch support for comfort. Replaceable calks were added to provide outstanding traction in wet and snowy conditions.

#4C

- Lace-up front for snug fit.
- Steel shank for support.
- Sizes 6-13 (whole sizes only)

16" XTRATUF NON-INSULATED/INSULATED BOOT

For those who work around hydraulic fluids or chemicals, this 16" neoprene boot offers added protection. This is an industrial grade boot which means extra durability and wear for you. This 100% waterproof pull-on boot comes equipped with your choice of a calk or chevron sole.

HOFFMAN THINSULATE SAFETY TOE BOOT

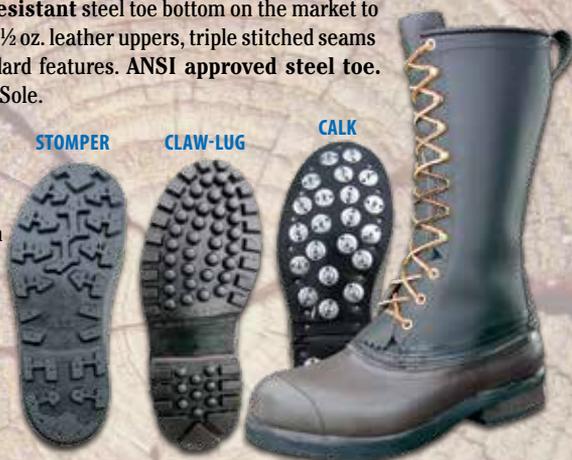

For those needing a **steel toe**, our Thinsulate® safety boot is perfect for the logger on the go. A **pure natural rubber bottom** features layers of polyester and polyamid to slow chain saw penetration. It provides the most durable and **crack resistant** steel toe bottom on the market to date. Removable Thinsulate® liners, 7-7½ oz. leather uppers, triple stitched seams and a replaceable **calk sole** are all standard features. **ANSI approved steel toe**. Available in Calk, Claw-Lug and Regular Sole.

#12STC Calk Sole

#13STM Claw-Lug Sole

#13STR Stomper Sole

- Industrial grade steel toe rubber bottom
- Calk, Claw-Lug or regular soles
- Removable Thinsulate/Wool/Cambrelle liner.
- 7 ½ oz. oil-tanned leather uppers.
- Rebuildable for years of service.
- For mild winter conditions.
- Sizes 7-14 (whole sizes only)
- 10", 12" and 14" heights

HOFFMAN FELT STEEL TOE LOGGER

The Hoffman Felt Steel Toe Logger has been revamped into a sturdier, longer lasting boot. The **NEW Hoffman Felt Steel Toe Logger** features an improved rubber bottom made with NBR and natural rubber that will prolong the wear on the rubber portion of the boot. A 9mm felt liner provides more warmth than traditional thinsulate style liners. The Hoffman Steel toe Felt Pac also features your choice of a calk, claw-lug, or regular sole and a triple stitched 7 ½ oz. leather upper. For those working in cold temperatures or those who are less mobile on your job and need a safety toe, this boot makes an excellent choice.

#19STC Calk Sole

#20STM Claw-Lug Sole

#20STR Regular Sole

- Available in calk, claw-lug or regular soles.

- Rebuildable for years of service.
- For colder winter conditions.
- Sizes 7-14 (whole sizes only)
- 10", 12" and 14" heights

Hunting/Hiking Boots

6" EXPLORER LIGHT

Lightweight, supportive and all day comfort is everything you could ask for in a high performance hiking boot. The Explorer Light combines premium full grain leather, supportive nylon midsoles, and a high-traction Vibram Masai Outsole for excellent traction. Whether it's multiple days back packing through the Bob Marshall Wilderness or a weekend hike, the Explorer Light will perform to your highest expectations. Made in Italy.

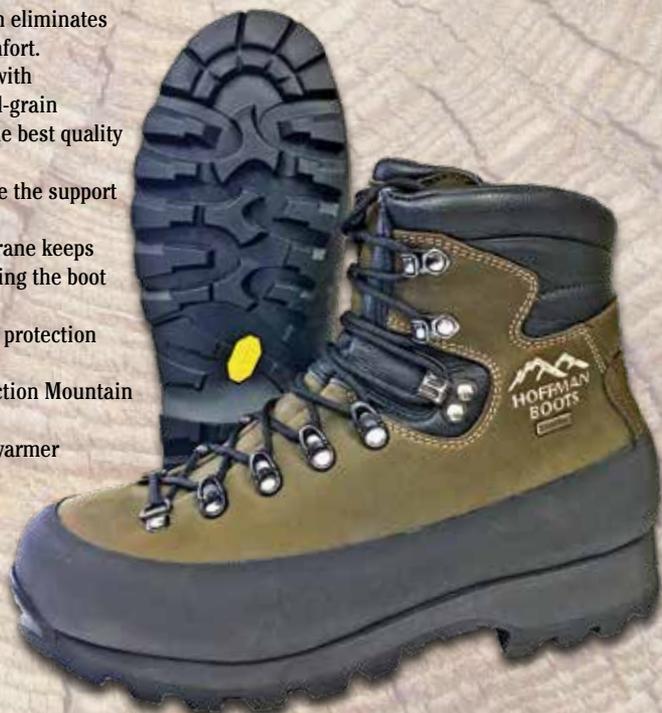

Explorer Light Features:

- One-piece vamp construction eliminates seams that can cause discomfort.
- 6½" tall uppers constructed with 2.8 – 3.0 mm amphibious full-grain waterproof leather. Simply the best quality leather available.
- Heavy nylon midsoles provide the support needed on uneven terrain.
- Waterproof Sympatec membrane keeps the moisture out while allowing the boot to breathe.
- Heavy duty rubber rand adds protection and support to the upper.
- Vibram 1212 Masai High-traction Mountain Sole for excellent traction.
- Non-insulated designed for warmer and mild conditions.

#6EXP

Medium Width
(7-13 w/ half sizes, 14, 15)

Wide Width
(8-12 w/ half sizes, 13, 14)

8" EXPLORER *(Non-Insulated or Insulated)*

The Hoffman Explorer is a lightweight mountaineering boot designed to offer unsurpassed support, ankle stability and comfort. The Explorer's 8" one-piece 2.8-3.0 mm leather uppers, combined with a durable rubber rand, protects your feet from thick underbrush and rocky terrain. A breathable waterproof Sympatec membrane keeps you dry and comfortable when Mother Nature doesn't cooperate. Heavy duty full-length nylon insoles provide all day stability and support without giving up flexibility. Made in Italy.

Explorer Features:

- One-piece vamp construction eliminates seams that can cause discomfort.
- 8" tall uppers constructed with 2.8 – 3.0 mm amphibious full-grain waterproof leather. Simply the best quality leather available.
- Heavy nylon midsoles provide the support needed on uneven terrain.

Wide Width (8-12 w/ half sizes, 13, 14)

10" HOFFMAN HUNTER *(Non-Insulated or Insulated)*

Our desire to design the perfect boot for Elk and Deer hunters has led us to the creation of the 10" Hoffman Hunter. Many mountaineering boots offer plenty of support but for many big game hunters, they are just too stiff. This can often cause heel slippage or what many refer to as "heel bite". The Hoffman Hunter is the perfect balance of support for lateral stability and pack loads while offering some flex for your feet on mountain ascents.

Features:

- 10" tall 2.8mm thick premium full grain leather uppers with one piece vamp construction.
- Reinforced double and triple stitched upper.
- 5 ½ mm nylon midsoles for support and flex when needed to prevent heel bite.
- Hoffman's lace hardware that swivels prolonging the life of the boot lace.
- Reinforced rubber rand for abrasion resistance that prolongs the life of the upper.
- Sympatec waterproof breathable flexible membrane.
- Non-insulated or 800 Gram Thinsulate Insulation.

Wide Width (8-12 w/ half sizes, 13)

6" SCOUT

There is a fine balance to making a lighter weight boot that still offers the quality features needed to perform in the outdoors. With the New Hoffman Scout, we believe we have done just that. The Scout weighs nearly ½ pound lighter than the 6" Explorer. With a more flexible dual density sole with PU inserts that provide enhanced stability, the Scout offers more flex while walking providing you with comfort without sacrificing stability. The Scout is the perfect boot for early season or anytime a less rigid boot is needed.

#Scout

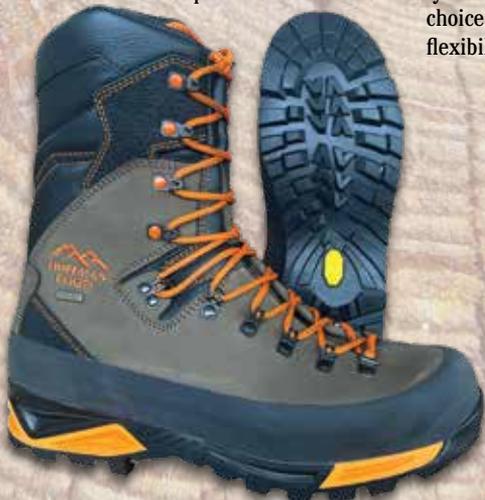

Scout Features

- Reinforced, double-stitched tongue w/ ergonomic design
- Full rand for increased protection.
- 4-5mm nylon midsole for easier flex
- 100% Waterproof Sympatec™ membrane
- Dual Density Sole w/ PU Inserts for stability
- Non-insulated
- Vibram™ New Winkler™ outsole
- 2.8-3.0 mm full grain leather upper
 - 3.14 lbs. a pair (size 9)
 - Handcrafted in Italy
 - Sizes: Med. Width (Sizes 8-12 w/ half sizes, 13, 14)
 - Wide Width (8-12 w/ half sizes, 13)

8" BORAH

You asked for it so we built it. A lighter weight version of the iconic 8" Explorer with a more flexible platform for those looking for a more flexible boot. The 8" Borah has several great features that make it an outstanding choice... a waterproof Sympatec membrane, full length rubber rand and a padded leather cuff. Still focusing on quality and longevity, a premium 2.8-3.0 mm full-grain leather upper with a nubuk finish and a water-repellent treatment was added. The Vibram New Winkler dual density sole with PU insert provides enhanced stability and traction with every step. The Borah is the perfect choice if you're looking for a stable outdoor boot with more flexibility than our traditional Explorer series.

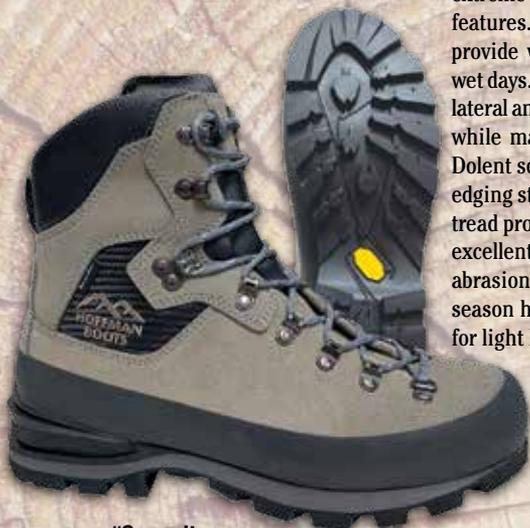

Borah Features:

- Full rand for increased protection.
- 4-5mm Nylon midsole for easier flex
- 100% Waterproof Sympatec™ membrane
- Dual-density new Winkler sole w/ PU inserts for stability
- Non-insulated
- 2.8-3.0 mm full grain leather upper
- 4.3 lbs. a pair (size 9)
- Handcrafted in Italy
- Sizes: Med. Width
 - (Sizes 8-12 w/ half sizes, 13, 14)
 - Wide Width (8-12 w/ half sizes, 13)

#Borah

NEW 6" SUMMIT

#Summit

A mid-height mountain boot ideal for work, backpacking or early season hunts where the terrain is both extreme and unforgiving. The Summit has many great features. A SympaTex waterproof bootie is added to provide waterproof protection for those unexpected wet days. A 5 1/2 MM Nylon mid-sole provides excellent lateral and foot support while providing the flex needed while making an ascent. The long-wearing Vibram Dolent sole features an alpine tread design with high edging stability for precise footing and a self-cleaning tread profile. A protective rubber rand is added to this excellent boot to help protect the leather upper from abrasion. The Summit is an excellent choice for early season hunters, backpacking and also as a work boot for long line work and other tasks.

Summit Features:

- 100% waterproof Sympatex membrane
- Dual-density PU cushion insole
- Long wearing Vibram Dolent™ outsole
- 5 1/2 MM nylon mid-sole for support
- Non-insulated 3.8 lbs/pair (Size 9)
- Made in Italy
- Sizes: 7-13 w/ half sizes, 14

9" CAMPER

Tired of lacing your boots up? The insulated Hoffman Camper is a pull-on style pac boot with a Velcro closure that fits like a lace-up. It allows similar fit, comfort, and warmth as our lace-up boots and is easy to get on and off. Perfect for errands, shoveling snow or around camp, the Camper boot features a removable 400 gram Thinsulate and wool felt liner, which provides warmth without the bulk of conventional pac boots. The Camper is available in either a traditional tractor tread sole or a more aggressive air grip sole. The Camper boot is also rebuildable for years of service. You'll enjoy the comfort and ease of the Camper, no matter your need.

AIR-GRIP

TRACTOR

Camper Features:

- Designed for mild conditions
- 400 gram Thinsulate/Wool/Cambrelle liner
- Rebuildable bottom for extended wear
- Steel shank for support
- Velcro closure on upper
- Sizes 7-14 (whole sizes only)

#Camper airgrip

- Sizes Med: 7- 9 1/2, Larger: 10-12, Xtr-Large: (13 – 15)

#Hoff OTC

DARN TOUGH SOCK *Made in U.S.A.* (w/Lifetime Warranty)

“As the maker and marketer of Darn Tough Socks, we are unique. In an era of outsourcing and corporate takeovers, we are still true to our roots. Family-owned and run, in Vermont, since 1978. In a word, local. Our experience is our reputation and we back it up with our lifetime guarantee. If our All-Weather Performance Socks aren't the most comfortable and durable socks you've ever owned, return them for your money back. This over-the-calf sock has an excellent fit. High density cushioning surrounds entire foot and lower leg. Custom shrink-treated Merino wool and ribbing above the ankle ensures a proper fit. Reinforced heel and toe with elastic support around the arch.” Ring-toe construction for a comfortable, invisible seam. Generous sizing: calf stretches 1" more than our traditional sock fit, allowing for a wider range of fit.

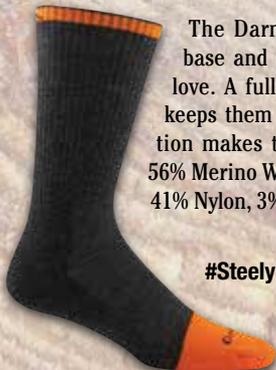

Contents: 70% Merino Wool, 26% Nylon, 4% Lycra® Spandex.
Sizes: Med(6-8 ½) Lrg.(9-11 ½) XL (12 +)

#Tough

THE DARN TOUGH STEELY SOCK

The Darn Tough Steely sock has added high density cushioning on the foot base and shin that makes for a supportive feel that people on their feet all day love. A full cushioned toe box supplies added comfort. Fine gauge Merino wool keeps them cool in the summer and warm in the winter. True Seamless construction makes them irresistibly comfortable. Still made in USA. Guaranteed for life.
56% Merino Wool,
41% Nylon, 3% Lycra® Spandex

#Steely

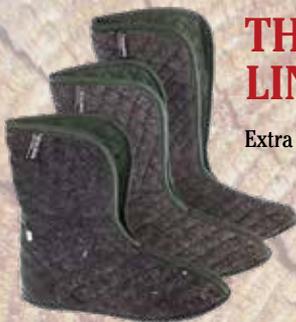

#Belt 111 (Black)

#Belt 123 (Dark Brown)

BELTS

You won't find a nicer belt than these. These heavy duty belts from R. G. Bullco feature an oil tanned leather finish and are available in black or dark brown. Available in standard lengths of 30 to 44. Made In The USA with 100% Full Grain Backstrap Leather.

THINSULATE® 200 AND 400 GRAM LINERS

Extra liners are recommended and will help extend the life of your boots. The Thinsulate®, Cambrelle® Liner is combined with wool for added warmth and wear. An extra set of liners ensures that you will always have a dry pair. Available in 200 gram Thinsulate® in sizes 6-15, 10", 12" and 14" heights, and in 400 gram Thinsulate® in 12" and 14" heights.

#TLINE200
#TLINE400

Note: these liners will only fit in boots designed to take a Thinsulate liner.
